

Note: Could we arrange for our building to be 20mm smaller on both depth and width to overcome the issues? As you can see from the detail, the post is 140mm and the baseplate is 160mm, the edgings are being installed to the frame size, hence the 10mm clash with the edgings.

Dense Asphalt Concrete 250mm o/a Thickness

Drawing Number: BB_2020_250mmAsphalt_A

Scale 1:5
